Russian Food Shortage

A United Nation's Food and Agriculture Organization report listed 33 countries which have an actual or potential lack of sufficient food. Russia, Armenia, Azerbaijan, Georgia and Tajikistan were five of the CIS (Commonwealth of Independent States) named in the report. Twenty of the countries were in Africa.

Russia's sales of meat and poultry continued to decline in 1998. The total of 7.4 million tons was about 5% lower than the previous year. Egg output increased by 1% to 32,549 million. Yields improved from 234 to 237 eggs/bird. The total number of poultry at the end of 1998 was 359 million, down fractionally (-0.3%) from 1997 levels.

Newcastle Disease in Australia

Poultry Programs

A news release on April 1 reported all necessary actions were being taken to deal with a suspected outbreak of Newcastle disease in poultry in the central coast area. One poultry pullet rearing farm was placed in quarantine and about 27,000 birds were slaughtered. By mid April three new outbreaks occurred, all broilers within a few kilometers of the original pullet farm. About 200 people were involved in the early control operation, including 126 volunteers. A total of 280,000 broilers were slaughtered. Australian Governments approved a full eradication of Newcastle Disease on the Mangrove Mountain Ridge on the New South Wales (NSW) Central Coast.

On April 29 authorities confirmed that Newcastle disease was still confined to the Mangrove Mountain ridge on the central coast of NSW. Ten poultry farms in the area had been affected by Newcastle disease and a further 20 farms were destocked in an effort to contain the disease. A workforce of nearly 1000 local, state and federal government agency personnel and volunteers, including 90 Navy personnel, were involved destroying birds.

The slaughter actually began in September, 1998 after 1,200 birds died on two farms. At that time, 100,000 chickens were killed, but the mass slaughter has been stepped up in the past two weeks.

Australia has a \$2 billion chicken industry and as many as 5 million birds in the Peats Ridge/Mangrove Mountain district were considered at risk. Sources noted the current outbreak may result in nationwide Newcastle vaccination of poultry in Australia.

WEEKLY VOLUME (000) 164 20 104 108 1,432 2,148

NATIONAL YOUNG TURKEY PARTS AND BULK MEAT, FROZEN (UNLESS SPECIFIED), CENTS PER LB., DELIVERED FIRST RECEIVERS, PART AND FULL TRUCKLOTS

APRIL 30, 1999

Undertone steady to weak on fresh tom breast meat, steady to barely steady on destrapped tenderloins and frozen tom breast meat. Demand light to fair on institutional breasts with offers not as tight when compared to previous weeks. Tom breast meat demand light with some older frozen noted at 160 cents delivered. Export demand and trading continues active on frozen thigh meat for multiple destinations. Some areas noting an improved export call on frozen 15-20% skin added mechanically separated turkey at lower price levels, while others remain slow. Grade A 10-12 lb. breasts (part load) 137 cents delivered domestic.
